SUMMARY

Electrical Engineering student with a Minor in Cyber Physical Systems at NIT Calicut, experienced in building full-stack software applications using Java, Python, Node.js, React, and SQL. Strong foundation in software engineering, cybersecurity, and data structures with hands-on experience developing scalable, real-time systems and collaborative software projects.

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. Major	National Institute of Technology, Calicut	8.43 (Current)	2023-Present
B.Tech. Minor	National Institute of Technology, Calicut	8.33 (Current)	2024-Present
Senior Secondary	CBSE Board	96.2%	2022
Secondary	CBSE Board	95.6%	2020

EXPERIENCE

- AEH Intern | Accenture Solutions Pvt. Ltd., Hyderabad** *May 2026 - July 2026*
 - Developed a modular PL/SQL backend service integrating Cohere LLM and Oracle FCCS REST APIs to automate enterprise financial data retrieval throughout the software development lifecycle.
 - Designed and implemented autonomous backend services using REST APIs, JSON processing, and Oracle EPM integrations to automate multi-step workflows while eliminating data validation failures.
 - Architected and deployed an asynchronous API pipeline enabling reliable communication between distributed software services, improving transaction reliability to >99%.

PROJECTS

- Real-Time Packet Capture and Intrusion Detection (IDS) System** *Nov. 2025 - Jan. 2026*
Suricata | Node | TypeScript | React | Socket.IO | libpcap | Tailwind CSS *Github*
 - Designed and developed a modular network intrusion detection platform using Node.js, React, and Suricata.
 - Implemented asynchronous log ingestion, real-time event streaming, and backend integration using Socket.IO.
 - Developed reusable frontend components for live SOC monitoring and packet visualization.
- Activity Points Management System (Frontend)** *Jun. 2025 - Jul. 2025*
React | Tailwind CSS | Typescript | Git *Github*
 - Developed reusable React and TypeScript UI components following responsive design principles.
 - Collaborated using Git for version control, feature development, and backend API integration within a multi-developer team.
 - Participated in feature development, debugging, and frontend integration following Agile development lifecycle.
- Stroke Prediction Model** *May. 2025 - Jun. 2025*
Streamlit | Scikit-learn | Pandas | Matplotlib *Streamlit | Github*
 - Performed exploratory data analysis and feature engineering for stroke prediction.
 - Addressed class imbalance using SMOTE and tuned hyperparameters for better ROC-AUC.
 - Visualized feature relationships with SHAP; deployed with Streamlit.
- Dynamic GST Invoice Generator** *Feb. 2025 - Mar. 2025*
HTML | CSS | Javascript *Github*
 - Developed a responsive web application for dynamic GST invoice generation and automated tax calculations.
 - Implemented modular JavaScript components for dynamic DOM rendering, client-side validation, and invoice generation.
 - Designed printable invoice templates with responsive layouts, improving usability across desktop devices.

TECHNICAL SKILLS

- Programming:** Python, C/C++, Java, SQL, DSA, OOPs
- Software Development:** React, Node.js*, REST APIs, WebSockets, Git, GitHub, Tailwind, SDLC
- Security:** Linux, Wireshark, TCPDump, Suricata ** Elementary proficiency*

POSITIONS OF RESPONSIBILITY

- Senior Executive**, Google Developer Group, NIT Calicut *Jan. 2025 - Present*
- Executive Head**, Poster & Design Committee, Tathva NIT Calicut *Oct. 2025 - Nov. 2025*
- Senior Executive**, AlgoZenith, NIT Calicut *Sept. 2024 - Present*
- CODM Organizer**, E-Sports Club, NIT Calicut *Nov. 2024 - Sept. 2025*
